

Capability Statement

GREENWOOD CONSULTING
ENGINEERS

Greenwood Consulting Engineers (GCE) specialises in providing expert structural engineering solutions to architects, building designers, and builders. With a dedicated, growing team, we pride ourselves on delivering innovative, practical, and cost-effective structural advice tailored specifically to your project's needs.

Our Services

Class 1 Buildings

- Decks, pools, pergolas
- Single-storey and multi-storey residential homes
- Luxury concrete-formed residences
- Residential alterations and additions, including:
 - Ground and first-floor extensions
 - Internal wall removals and modifications
 - Structural assessments for kitchen/bathroom renovations
 - Attic and basement conversions
 - Roof modifications and framing upgrades
 - New garages, carports, and sheds
 - Retaining walls and landscaping structures
 - Foundation and footing assessments

Class 2 Buildings

- Structural wall removals
- Pre-design assessments for alterations and additions
- Remedial structural engineering

Why Choose GCE

Client-Focused

We prioritise your vision, ensuring that our solutions align seamlessly with your design goals and project objectives.

Economic Solutions

We provide cost-effective engineering solutions without compromising on safety, quality, or structural integrity.

Project-Focused

Our team remains committed from concept to completion, proactively identifying challenges and opportunities at every stage.

Solution-Based Consulting

Our approach is pragmatic and solution-driven, tackling complex problems efficiently to deliver optimal outcomes for our clients.

GREENWOOD CONSULTING

I have had the pleasure of working with Eliot from Greenwood Consulting Engineers for the last eight years in the capacity of structural engineering for many of my architectural projects. Eliot is approachable and always engaged to find the best solutions on site and at the design stage.

His collaboration has supported many successful designs - from providing valuable advice early in the sketch planning stage, detailed documentation, right through to construction through regular inspections and pivoting where needed due to unforeseen circumstances on site.

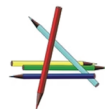

I would have no hesitation in recommending him to others seeking a diligent and personable engineer.
